

Client Testimonials

Electrosonic - AV Service Solutions

We have contracted Electrosonic each year since installation to perform preventative and emergency maintenance of our exhibit media. They have continued to do an exemplary job and as a result we have had very little down time. If we had not been 100% satisfied with Electrosonic's services, we would have initiated the steps to find another vendor.

Dwight Schmidt, *IT Manager*
National Museum of the American Indian

Gettysburg has more than one million visitors annually. We rely on our Electrosonic on-site technician to ensure that all AV equipment is fully functional and maintained. We cannot afford to have our fee venues offline for any amount of time. Thanks to the diligent work of Electrosonic our track record has been exemplary.

Elliot H. Gruber, *Vice President and Chief Operations Officer*
Gettysburg Foundation

The Delaware Park Racetrack enlisted Electrosonic's Lamp Program and the overall experience has been a great one. Our Electrosonic service technician has a great eye for detail and color, which comes in handy when he balances the lamps for our vision cubes.

Fran McLaughlin, *Park Operations & Maintenance*
Delaware Park Racetrack

Projection is a critical component in creating environments across our 5 campus locations and we require comprehensive support from a projector service standpoint. Whether it's lamp refurbishment, calibration, cleaning or complete overhauls, Electrosonic is a solid choice. Specifically, our experience with Electrosonic's service technician has been great. He is prompt, reliable and a valuable resource for our team.

Brendon Petty, *Technical Director*
North Point Ministries

I have tried many vendors and all of them have had their issues; anywhere from no availability, poor support, slow shipping, to canceled orders. Electrosonic claimed to be able to supply our projector lamps. I was skeptical, but their response time and communication were the best ever. They were also able to get all of the lamps I needed. Electrosonic is now my one stop for projector lamps.

Ashley Lane, *Chief Engineer/Production Technician*
Perimeter Church Tech Dept.
